Currently, Tytanit has a number of licensed companies all around Africa. They vary from betting to casinos to slots, both offline and online, as well as national lotteries.

# Our focus - Africa & Gaming

## Africa

Africa has a population of 1,3B (17% of the world population) and density of 43,2 people per km<sup>2</sup> - 2nd most populous continent in the world, as well as the fastest population growth rate of 2,5%. 41% of the African population is under the age of 15.

Africa has tripled its GDP since 2000, with a growth of +4,6 % year, where our hand-picked markets reach average GDP growth of even over 10%.

Africa is home to five of the world's top oil-producing countries and is rich in other precious resources like diamonds, gold, nickel and uranium, titanium, graphite, iron, aluminium and copper. Rapid urbanisation is observed all across the continent. Currently, we observe a dramatic growth in adoption of mobile technologies on the continent, including SIM connections, smartphone and internet penetration and mobile money.

## Gaming

The global gambling market size is expected to reach revenues of over \$525 billion by 2023, growing at a CAGR of around 4% 2017-2023, where developing markets take the lead with massive growth.

The increase in per capita income, high adoption, growing interest and growth of dual-income households are some of the factors augmenting the growth of the global market.

The global gambling market is driven by increasing penetration of online gaming and betting.
